1) Existing AT&T Customers will transition to new rates beginning no later than September 1, 2011.
2) Greenwood MIS with Co-Location Services with a pre-built rack within an AT&T Central Office along with a direct connection to the AT&T IP Backbone:
DIR hereby agrees to pay AT&T TWO THOUSAND FIVE HUNDRED AND NO/100 DOLLARS ($2,500.00) monthly for Greenwood co-location services for a total annual value of THIRTY THOUSAND AND NO/100 DOLLARS.
DIR hereby agrees to pay AT&T EIGHT THOUSAND TWO HUNDRED FIFTY ONE AND NO/100 DOLLARS ($8,251.00) monthly for MIS 1 Gig Baseline Port for 36 months. The early service termination cost is 50% of the monthly recurring charges.

Pricing Terms and Conditions

These Pricing Terms and Conditions apply only to Services administered under the TEX-AN NG Contract: DIR - TEX-AN-NG CTSA 005.

These Pricing Terms and Conditions are of general applicability except where specific alternative treatment of the subject is stated.

Term Requirements:

1) Non Recurring Charges (NRC) apply for Local Services which are offered on a Month to Month basis.
2) Unless otherwise stated, Non Recurring Charges for all Services, including Smart Trunks are waived contingent upon Customer maintaining Services for period of no less than 24 full months otherwise, the waived installation fees will be recovered by AT&T from customer. This is not applicable to custom, MIS or Advanced Features.
3) Non Recurring Charges may apply for custom, ICB, Emerging Technologies or Advanced Features as defined in the pricing schedule.
4) Managed Internet Service (MIS) Ports and its associated components term is equivalent 24 month minimum term period per line without exception.

   Flat rate MIS: rates for the MIS port are contingent on port bundled with access for T1, NXT1, and DS3 access speeds where access is purchased from AT&T (total service bundle required).

   MIS Fast Ethernet: Rates for the MIS port are contingent on a bundled offer with the Ethernet access. EAMIS is sold as a total service. Subject to the standard availability and qualification of the EAMIS product as documented in the Guidebook. MIS Fast Ethernet port only pricing can be used whenever the Ethernet access is existing and belongs to the AT&T LEC SBC.

   Minimum payment period of 24 months is required on all individual service components of product. Installation charges waived. Full recovery of waived installation fees is required if minimum payment period is not met.
5) Repaying of previously waived installation charges or early service termination cost will not apply to disconnects as an SLA remedy for Chronic conditions as set forth in Attachment D-1 to Exhibit D, Performance Management of the CTSA.
6) Fiber based Services (See Exhibit C / Attachment C-1 Pricing ASE, CSME, Opteman, Gigaman and EPLSWAN) require a 2 year term per individual line / circuit installed. If the commitment time period is not met, the early service termination cost shall be recovery of the previously waived NRC, except for Gigaman. The early service termination cost for Gigaman and ADE is 50% of the monthly recurring charges.
7) For rate elements not found in the Pricing Sheets, either Service Guide rates or existing Tariff rates, rules and regulations will apply for all Local Services and all existing services that have been ordered and provisioned prior to the Effective Date of this Amendment. However, in order for a Customer to order rate elements for any other services that are not reflected in the Pricing Sheets, such rate elements must first be reviewed and approved by AT&T and DIR, and added to the Pricing Sheets via execution of a mutually agreed Amendment.

8) Services assume AT&T Texas facilities exist and no special construction will be required. If special construction is required and it results in a higher rate for the specific service, then DIR and /or the Customer, as appropriate, will have the option to accept the new rate or withdraw the request for that specific service.
9) Customer initiated changes to the service delivery model that require changes in the service delivery elements such as central offices, fiber distribution systems, platforms, etc. may result in an adjustment in the Customer price. Example: customer requests copper service delivery changed to fiber and may result in adjusted pricing.
10) Certain products and services that are offered by AT&T are subject to our quality control lifecycle management process. This includes notification of product retirement, sales hold, grandfather date, sunset date and end of life date. AT&T will consult DIR and its Customers to offer migration strategies to the newer emerging technologies.

Term Requirements:

LD Voice Rates: If AT&T's billing system limitations prevent the implementation of net effective rates to the precision shown below, net effective rates may be rounded, not truncated, as necessary to implement rates as accurately as possible. AT&T will notify DIR of any variation in the OneNet rating as stated in the F-18 Billing Plan.

Local Access: Non-standard Local Access Pricing has been approved for DS3, OC3, OCX, Fiber/Ethernet based access with the following contingency. Access pricing is being differentiated by In-Franchise (serviced by AT&T) vs. Out-of-Franchise (3rd party providers). Pricing approved is only applicable where AT&T is the Incumbent Local Exchange Carrier (ILEC), where facilities are available, for Local Channels where AT&T Corp or an AT&T Affiliate or Subsidiary owns the facilities form the Customer Premises to the AT&T Central Office. Out of region locations will be reviewed on an ICB basis for pricing.

Fiber Based Access: If 3rd party provided service and does not terminate within AT&T POP or AT&T Central Office, customer will be responsible for payment of all 3rd party service surcharges.

Fiber Based Access: These rates are contingent upon completion of a facility check. These rates cannot be included in a contract unless the results of a facility check are provided by the account team. If the facility check results in a one-time Non Recurring Charge (NRC), that charge must be included in the contract incremental to the rates stated above.

MPLS (AVPN): AVPN discounts authorized when access is provided by AT&T Corp (aka Total Service). Stand alone AVPN port purchase not supported by this pricing agreement. Clear Channel access for AVPN is included in the rates provided.
AT&T is providing a no-cost wireless backup service to the AVPN services provided under the DIR-TEX-AN-NG CTSA 005 between AT&T and Customer. This backup service is provided under the terms of a separate Statement of Work.

Under the terms of the Statement of Work, the supplementary terms for Operation Quality of Services are not part of the standard AT&T VPN back up wireless service offering and will be provided by customized service offering and not by the standard AT&T VPN service team. These supplementary terms for Operation Quality of Service will govern the provision of wireless failover services as described in the Statement of Work and the terms of the AT&T VPN Mobility Features listed in the Service Guide do not apply. The supplementary terms for Operation Quality of Service being provided under the Statement of Work are in addition to those described in the AT&T Business Services Guide for AT&T VPN Services and do not amend or supersede the standard features of AT&T VPN offer, however only the Site Availability SLA will be amended to reflect this custom solution and will supersede how the credit will be calculated based upon a full site outage.

Net Bond Services: Approval must be obtained by the DIR Contract Manager prior to any Netbond services being sold to any State Agencies. AT&T will identify which State agency, which cloud vendor the service will connect to and for what purpose.

Co-location Services

* AT&T Co-location Services is a hosting and application services solution that provides conditioned data center space, power, connectivity, and IT support for your hosted IT infrastructure. Co-location Services gives you a highly secure, reliable, and scalable foundation for your infrastructure and applications in an AT&T Internet Data Center (IDC).
* We provide Co-location Services from our 38 IDCs. Because we have so many IDCs and because they're on four continents, we have the global presence to serve multinational corporations whose employees or customers need distributed IT operations or worldwide access.
* In addition, our IDCs' multi-layered security, fail-safe redundancy, and network diversity help protect your system from intrusion or failure. To further support reliable hosting, IDCs guard against fluctuations in, or loss of, commercial power. For example, an uninterruptible power supply (UPS) helps keep voltage consistent. If an outage occurs, on-site batteries support the UPS while we power up generators. For longer commercial outages, diesel generators provide continuous power.
* We complement this infrastructure with redundancy in components and paths to help eliminate failure. As a result, our IDCs historically average over 99.999% availability, which surpasses the typical availability for data centers in their class. So, even in the unlikely event of commercial power loss combined with one or more failures in the IDC, your computing infrastructure continues to run.

AT&T will provide to DIR for portability allowances up to $10,000 in a single month as a credit to negate normal termination liability charges for service moves that require a circuit to be relocated from one location to another location provided that the circuit disconnect order and new connect orders are issued within 30 days of each other.

DIR may on at least 30 days prior written notice to AT&T, terminate its use of any Service after the Service commencement date but prior to the end of the initial Service term, without payment of any applicable termination liability if:

- DIR places and AT&T accepts an order for a new, replacement Service of the same Service type with equal or greater capacity with a Service Term of not less than the remaining Service term of the Service being terminated.
- DIR pays all non-recurring charges applicable to the replacement service.
- The monthly recurring charges applicable to the replacement Service are not less
- The monthly recurring charges applicable to the replacement Service are not less than the monthly recurring charges payable for the Service being terminated.

DIR will: 1) Allow on a case by case basis at the agency/customer level, the choice to strategic source and award AT&T as their sole source ATM/FRAME and MPLS (AVPN) provider through 12-31-2014. 2) Award AT&T Premium Services.
AT&T will: 1) hold firm the ATM/Frame prices for existing TEXAN 2000 customers through 3-31-2014 for customers that DO opt for AT&T MPLS AVPN if such customers have submitted orders to A&TT by December 31, 2013 and such migration is completed by March 31, 2014. However the ATM/Frame prices will be extended beyond March 31, 2014 in the event the AT&T installation interval for the MPLS AVPN service extends beyond March 31, 2014 due to AT&T's delay. 2) hold ATM/Frame prices for existing TEXAN 2000 customers through 3-1-2012 for customers that DO NOT opt for AT&T MPLS AVPN. 3) Additionally, AT&T will provide for a reasonable transition period of up to two weeks without dual network billing for customers transitioning from AT&T ATM/Frame to MPLS (AVPN). The two week timeframe will begin on the date of installation of the circuit which shall not occur prior to the due date. Should the circuit be installed prior to the due date, the two week period will commence from the actual due date quoted.
Opting for AT&T MPLS AVPN was established by Customer submitting a signed letter of declaration indicating the decision to stay with AT&T and to migrate all AT&T ATM/Frame services to AT&T MPLS AVPN services by 12-31-2014. Such signed letter of declaration was delivered to AT&T prior to 12-31-2011. See Appendix C-1 of DIR-TEX-AN-NG-CSA-ICXXX.

DIR will:

1) Allow on a case by case basis at the agency/customer level, the choice to strategic source and award AT&T as their sole source ATM/FRAME and MPLS (AVPN) provider through 12-31-2014.

2) Award AT&T Premium Services.

AT&T will:

1) For customers that DO opt for AT&T, AT&T will hold ATM/Frame prices for existing TEXAN 2000 customers through 12-31-2013.

2) For customers that DO NOT opt for AT&T, AT&T will hold ATM/Frame prices for existing TEXAN 2000 customers through 3-1-2012.

3) Additionally, AT&T will provide for a reasonable transition period of up to two weeks without dual network billing for customers transitioning from AT&T ATM/Frame to MPLS (AVPN).

The two week timeframe will begin on the date of installation of the circuit which shall not occur prior to the due date. Should the circuit be installed prior to the due date, the two week period will commence from the actual due date quoted.

Opting for AT&T shall be established by signing a letter of declaration to stay with AT&T and to migrate all AT&T ATM/Frame services to AT&T by 12-31-2014. The signed letter of declaration shall be delivered to AT&T prior to 12-31-2011. See Appendix C-1 of DIR-TEX-AN-NG-CTSA-005.

MRC to support AT&T MIS circuit of 100Mbps up to 1Gbps-per circuit charge-		$337.12	$0.00	
Per mitigation instance charge-charged every time mitigation is activated-		$556.64	$0.00	
There's no one-time setup fee for the AT&T Reactive DDoS Defense Service				
AT&T Reactive DDoS Defense only supports AT&T MIS customers. If support for Agnostic circuits is required, please consider AT&T DDoS Defense-Agnostic service --> use "DDoS Defense" tab in this pricing file.				
Only AT&T MIS customers in the United States are supported at this time.				
AT&T Reactive DDoS Defense offer Monthly Recurring Charge (MRC) is charged per circuit				
The per mitigation charge is applied every time the client engages AT&T to start scrubbing their traffic liberating them from a DDoS attack.				
A mitigation can cover the client's "registered" public IP address (up to 10) simultaneously.				
After activation, a mitigation will be in place for a set time period of eight (8) hours after which normal routing is restored.				
Note: DDoS Reactive Plan is independent of other DDoS services and can stand alone on a per circuit basis.

Enterprise Traffic Protector			
Enterprise Traffic Protector - ADI/ETP Attach	**Circuit Size**	**MRC**	**NRC**
Size of Internet Circuit	ADI / Internet Service 0 - 99 Mbps US	$84.00	$0.00
Size of Internet Circuit	ADI / Internet Service 100 - 499 Mbps US	$140.00	$0.00
Size of Internet Circuit	ADI / Internet Service 500 - 999 Mbps US	$224.00	$0.00
Size of Internet Circuit	ADI / Internet Service 1 - 2.99 Gbps US	$392.00	$0.00
Size of Internet Circuit	ADI / Internet Service 3 - 4.99 Gbps US	$560.00	$0.00
Size of Internet Circuit	ADI / Internet Service 5 - 6.99 Gbps US	$784.00	$0.00
Size of Internet Circuit	ADI / Internet Service 7 - 9.99 Gbps US	$1,120.00	$0.00
Size of Internet Circuit	ADI / Internet Service 10 - 14.99 Gbps US	$1,680.00	$0.00
Pricing for ETP Attach is based on the size of the internet circuit. ETP when attached with ADI (or third party internet circuit) gives customers the ability to block known Malware, Ransomware, Command & Control (C&C), and DNS Exfiltration attacks and optionally add acceptable-use policy enforcement as well. One or many unique policies can be selectively or holistically applied across all locations. For Fiber or Broadband circuit (asymmetric speed) price based on Upload Speed of the circuit.			
Enterprise Traffic Protector (ETP) Roaming	**Users**	**MRC**	**NRC**
Roaming Users	1 - 300 Users	$672.00	$0.00
Roaming Users	301 - 1,000 Users	$1.68	$0.00

Roaming Users	10,001 - 999,999,999 Users	$0.22	$0.00
ETP Roaming must be purchased with the ADI/ETP Attach. Pricing will be based on number of Roaming Users, at the end of every 12 month period AT&T ETP department will perform an audit to verify number of Roaming Users and notify DIR of number. ETP Roaming includes all features of the ADI/ETP Attach but also includes the ETP Client Connector. This feature allows customers the ability to provide protection to off-network clients with the ETP Client application, and to identify devices by-IP that have been blocked for clean-up/remediation. Additional Users must be ordered in increments of 100. Per user pricing is based on simple tiering (not progressive).

Users	20,001 - 999,999,999 Users	$1.38	$0.00
Pricing will be based on number of Advanced Users, at the end of every 12 month period AT&T ETP department will perform an audit to verify number of Advanced Users and notify DIR of number. Including all of the features of ETP Roaming, ETP Advanced is for those customers that require the most advanced defensive actions for prevention of threats and remediation. Advanced threat adds the ability to do in-line payload analysis where all risky domains are inspected against multiple anti-virus engines to detect the latest threats.

Locations	501 - 2,000 Locations	$3.91	$0.00
Locations	2,001 - 999,999,999 Locations	$2.61	$0.00
Pricing based on the number of locations, at the end of every 12 month period AT&T ETP department will perform an audit to verify number of Guest WiFi Locations and notify DIR of number. Provides DNS-based acceptable-use policy enforcement. For those customers with Guest-Wifi or networks where the concern is only to prevent users from accessing unacceptable content ETP Guest Wifi provides a list of over 50 curated categories that prevents customers from accessing unacceptable content (e.g. adult websites, cyberbullying, gambling, etc).

Premium Virtual Network Connection (VNC) provides for Class of Service capabilities for the NetBond Service			
*MBC is the Minimum Bandwidth Commitment			
Overage Charges are applied as follows:			

The capacity commitment in Mbps is selected, which is a fixed rate. Overage rates will apply for sustained capacity over the commitment levels. Capacity Overage is measured in megabits per second (Mbps) for a VNC during a billing month as follows:

• The aggregate total of all bits transmitted across the VNC (for all VLANs on a VNC) is measured, separately for each direction (inbound to and outbound from the cloud computing platform), in bits for each five minute period during the month.

• Each measured aggregate total of all bits transmitted across the VNC during a five minute period is divided by 300 seconds, to obtain a bandwidth measurement in bits per second.

• The total bandwidth measurements for each 5 minute measurement period in the month are ranked in order and compared to determine the 95th percentile measurement. Separate calculations are performed for inbound and outbound measurements, to determine the 95th percentile measurement for each category.

• The larger 95th percentile measurement (inbound as compared to outbound) is selected as the measurement for determination of Capacity Overage.

• The selected measurement is divided by 1,000,000 to obtain the Capacity Overage, expressed in Mbps.

• The customer is billed their Minimum Bandwidth Commitment (as per the green graphic above) plus any applicable additional usage above their MBC ("Overage").

Item	Amount	Description	Statutory Citation for Authority to Assess	Exempt Customers
911 Emergency Service Fee	$0.00 - $0.50	A business service user that provides residential facilities and owns or leases a private telephone switch used to provide telephone service to facility residents shall collect the 9-1-1 emergency service fee and transmit the fees monthly to the comptroller.	Texas Health and Safety Code, Section 771.071	State and all its Agencies are exempt from all fees imposed under Subchapter D, Chapter 771 (Health and Safety) and Chapter 772 (HHS)
911 Equalization Surcharge	0.0% - 1.0%	A business service user that provides residential facilities and owns or leases a private telephone switch used to provide telephone service to facility residents shall collect the 9-1-1 emergency service fee and transmit the fees monthly to the comptroller.	Texas Health and Safety Code, Section 771.072	State and all its Agencies are exempt from all fees imposed under Subchapter D, Chapter 771 (Health & Safety Code) and Chapter 772 (Health & Safety Code) by Section 771.074, Health & Safety Code.
Texas Universal Service Fee (USF)	0.0% - 3.4%	(USF) is the charge carriers pay the government on certain communication services. The USF supports high cost, rural & insular areas and low-income customers; as well as schools, libraries & rural health care providers. The USF rate is subject to change on a quarterly basis and is determined by the Universal Service Administrative Company (USAC).	16 Texas Administrative Code, Section 26.420(f)(5) *	State, its Agencies and all political subdivisions are exempt from all taxes imposed under §§56.021, 56.022, 56.107, 56.155 Utilities Code.
Expanded Local Calling Surcharge	$.0.00 - $7.00 plus $1.50 for each exchange in excess of five (5)	If the cost of providing ELCS exceeds the revenues the company offering the service receives, state law allows the telephone company to surcharge all of its customers in Texas to cover the lost revenue.	Public Utilities Regulatory Act (PURA) 55.048 (c)	No exemptions.
Municipal Franchise Fees	$0.63 - $6.83	54.206. RECOVERY OF MUNICIPAL FEE. (a) A holder of a certificate of convenience and necessity, a certificate of operating authority, or a service provider certificate of operating authority has the right to collect a fee that a municipality imposes under Section 54.204 or 54.205 through a pro rata charge to the customers in the boundaries of the municipality.	Texas Utilities Code, Section 54.206	No exemptions.
EUCL-End User Common Line Charge (Customer Subscriber Line Charge)	Percentage varies	Cost Recovery: "A charge that is expressed in dollars and cents per line shall be assessed to local exchange telephone service or Centrex service to the extent they do not pay carrier common line charges.	47 Code of Federal Regulations, Section 69.152 *	No exemptions.
FUSF- Federal Universal Service Fund	0.0% - 17.4%	The fees collected go towards a fund that pays for Internet access to schools and libraries and rural health care providers. The fund will also allow for the provision of local telephone service to the poor and for people living in rural areas where it's generally more expensive to local telephone companies to run telephone lines. Wireless carriers and pay-telephone providers also contribute to the fund.	47 Code of Federal Regulations, Section 54.712 *	No exemptions.
Federal Excise Tax	0.0% - 3.0%	The federal telephone excise tax is a statutory federal excise tax imposed under the Internal Revenue Code in the United States under 26 U.S.C. § 4251 on amounts paid for certain "communications services."	26 United States Code Annotated, Section 4251	State, its Agencies and all political subdivisions are exempt from all taxes imposed under 26 USC §§4253(i) and (j).
State Sales Tax	0.0% - 6.25%	State and local taxes are collected on all basic telecommunications charges	Texas Tax Code, Section 151.051	State, its Agencies and all political subdivisions are exempt from all taxes imposed under §151.309 Tax Code.
Local Sales Tax	0.0% - 2.0%	State and local taxes are collected on all basic telecommunications charges	Texas Tax Code, Sections 321.101, 321.201 & 321.301	State, its Agencies and political subdivisions are exempt from all local taxes under §321.208 (Municipalities) and §323.207 (Counties) Local Tax Code. Assistance Organizations may be exempt under §151.310 Tax Code.
State Franchise tax or Fee	0.70%	Assessed to corporations doing business in the State of Texas	Texas Tax Code 171.001, .002, .065 and .080. Public Utilities Regulatory Act (PURA) Section 53.202	All governmental entities are exempt.
Carrier Line Charge (CLC-1 & CLC-2)	$.027 per MLB $.004 per centrex line	The CLC is a regulatory surcharge that is designed to recover AT&T's PICC expense. The PICC is a monthly charge local companies can assess long-distance companies. The PICC is based on the number of phone lines subscribed to a long-distance company, and is intended to help local companies recover costs associated with providing local exchange service. Per the FCC, the PICC is paid directly to the local phone companies by the presubscribed interexchange carrier.	FCC	
Administrative Expense Fee (AEF)	0.88%	AEF is a charge AT&T utilizes to recover the administrative costs of managing the USF program. On 12/13/02, the FCC issued an order which dictated that beginning 3/1/03 carriers were no longer warranted the latitude to mark up their USF rates to include administrative and other variable costs. It further stated that carrier's recovery rates must be no greater than that of the USF factor itself. The order did acknowledge the significant burden on carriers and does allow for the recovery of administrative costs via a separate and distinct factor. AT&T developed and implemented the AEF fee 3/1/03.	FCC	

Universal Connectivity Charge (UCC)	13.60%	This charge recovers expenses Carriers are assessed on behalf of the Federal Universal Fund that we are charged by the Government	FCC	
Property Tax Allotment (PTA)	2.72%	The Property Tax Allotment (PTA) will be applied to all interstate and US billed international charges, excluding taxes, subject to billing availability. This is not a tax, but recovery of an expense that AT&T is required to pay. This expense represents the state and local property taxes imposed on AT&T for equipment and facilities AT&T utilizes to provide telecommunications.	FCC	
Federal Regulatory Fee (FRF)	2.14%	recovers amounts paid to the federal government for regulatory costs and telecommunications services for hearing impaired	FCC	
Federal Access Recovery Fee (FARF)	9.70%	recovers the regulatory fees (FUSF) that the Local Exchange Carriers (LECS) assess on AT&T in connection with obtaining the local access component	FCC	
Cost Recovery Fee (CRF)	% TBD	State of Texas Department of Information Resources Cost Recovery Fee / Contract Adminstration Fee	State of Texas DIR

Carrier Line Charge (CLC-1 & CLC-2)	$.027 per MLB $.004 per centrex line	The CLC is a regulatory surcharge that is designed to recover AT&T's PICC expense. The PICC is a monthly charge local companies can assess long-distance companies. The PICC is based on the number of phone lines subscribed to a long-distance company, and is intended to help local companies recover costs associated with providing local exchange service. Per the FCC, the PICC is paid directly to the local phone companies by the presubscribed interexchange carrier.	FCC	
Administrative Expense Fee (AEF)	0.88%	AEF is a charge AT&T utilizes to recover the administrative costs of managing the USF program. On 12/13/02, the FCC issued an order which dictated that beginning 3/1/03 carriers were no longer warranted the latitude to mark up their USF rates to include administrative and other variable costs. It further stated that carrier's recovery rates must be no greater than that of the USF factor itself. The order did acknowledge the significant burden on carriers and does allow for the recovery of administrative costs via a separate and distinct factor. JUNOS-WW-BB	JUNOS-WW-BB	Juniper Networks	JUNOS Internet Software Worldwide Version* - For M7i and M10i Base systems
M7iBASE-AC-1GE	M7iBASE-AC-1GE	Juniper Networks	M7i Base Unit: 4 PIC slot chassis, 1 built-in Gigabit Ethernet Port (optics sold separately), cooling, midplane, 1 AC power supply, JUNOS, 1 Forwarding Engine, 1 Routing Engine. Optional flash media kit sold separately.
PE-1GE-SFP	PE-1GE-SFP	Juniper Networks	1-Port Gigabit Ethernet PIC (Requires pluggable SFP Optics Module: SFP-1GE-SX, SFP-1GE-LX, SFP-1GE-LH, or SFP-1GE-T - See Interface Accessories section)
PWR-M10i-M7i-AC-BB	PWR-M10i-M7i-AC-BB	Juniper Networks	M7i,M10i AC Power Supply (ordered with base unit) (Note: AC power cords are sold separately)
RE-400-768-BB	RE-400-768-BB	Juniper Networks	RE-400 for M10i, M7i with 768 MB Mem Base Bundle
CBL-PWR-10AC-STR-US	CBL-PWR-10AC-STR-US	Juniper Networks	AC Power Cable, US (10A, 2.5 m) - Straight Version. Required for M7i and M10i
JS-IPv6-L_	JS-IPv6-L	Juniper Networks	IPv6 Support on JUNOS (low end)
PE-2OC3-SON-SFP	PE-2OC3-SON-SFP	Juniper Networks	2-port OC3/STM1 PIC. Requires OC3 SFP pluggable optics. See Interface Accessories section.
SFP-1GE-SX	SFP-1GE-SX	Juniper Networks	Small Form Factor Pluggable 1000Base-SX Gigabit Ethernet Optic Module
SFP-OC3-SR.	SFP-OC3-SR	Juniper Networks	Small Form Factor Pluggable OC3 Short Reach (SR) MM Optic Module - 2Km
SVC-ND-M7i	SVC-ND-M7i	Juniper Networks	Juniper Care NextDay Support for M7i
SRX650-BASE-SRE6-645AP	SRX650-BASE-SRE6-645AP	Juniper Networks	SRX650 System (2 RU Height) with SRE 6, 645W AC POE PSU. Includes 4 onboard 10/100/1000Base-T ports, 2GB DRAM, 2GB CF, 247W POE power, Fan Tray with Fans and Power Cord. Includes Front+Mid-Mount Rackmount Kit, Console Cable, Getting Std & Hw Safety Guide

SRX600-SRE6H	SRX600-SRE6H	Juniper Networks	SPARE: Services & Routing Engine 6 (SRE 6) supports Advanced Services & High Memory. Main system board for SRX650 series. Includes 2GB Flash and 2GB DRAM memory. Includes Content Security Accelerator. Max 1 in SRX650 Chassis.
SRX-GP-16GE	SRX-GP-16GE	Juniper Networks	Ethernet Switch 16-port 10/100/1000Base-T XPIM. Takes 2 slots. Spare
SRX650-RMK-02	SRX650-RMK-02	Juniper Networks	OPTIONAL: Rear-Support Rackmount Kit for SRX650.
