

# GETTING INTO THE MIND OF A CYBERCRIMINAL WITH ETAY MAOR

Cybercriminals today have a wide array of tools, techniques and technologies they can use to perform different types of attacks. In this session we will take a look into some of the news tools in the cybercriminal arsenal - from advanced Phishing and malware tools to services and offerings that help cybercriminals overcome the latest security systems. This session will include several live demos of cybercrime tools as well as OSINT (Open Source Intelligence) capabilities and detail the types of offerings criminals have on the dark web and how these offerings evolved and matured over the years.
