Ladies and Gentlemen:

We are pleased to submit the annual financial report of the Texas Department of Information Resources for the year ended August 31, 2018, in compliance with Texas Government Code Annotated, Section 2101.011, and in accordance with the requirements established by the Texas Comptroller of Public Accounts.

Due to the statewide requirements embedded in Governmental Accounting Standards Board (GASB) 34, the Comptroller of Public Accounts does not require the accompanying annual financial report to comply with all the requirements in this statement. The financial report will be considered for audit by the state auditor as part of the audit of the State of Texas *Comprehensive Annual Financial Report (CAFR)*; therefore, an opinion has not been expressed on the financial statements and related information contained in this report.

If you have any questions, please contact Reggie Pegues, Interim Chief Financial Officer, at 512-463-7900.

Sincerely,

Nick Villalpando
Interim Executive Director

Texas Department of Information Resources (313)

Notes to the Financial Statements

NOTE 1: Summary of Significant Accounting Policies

Entity

In 1989, the 71st Legislature established the Department of Information Resources (DIR) through the Information Resources Management Act [TEX. GOV'T. CODE, Chapter 2054]. DIR is an agency of the State of Texas and its financial records comply with state statutes and regulations. This includes compliance with the Texas Comptroller of Public Accounts' Reporting Requirements for state agencies.

DIR is an executive agency governed by a seven member voting board appointed by the Governor with the advice and consent of the Senate. Two groups each composed of three ex-officio members serve on the board on a rotating basis.

The Legislature charged the DIR with the mission to provide leadership in and coordination of information resources management within the state government. Toward this goal, DIR is committed to developing and implementing innovative management strategies for the efficient, effective and accountable use of information technology in state government. The department, in alliance with representatives from government and industry, identifies major information resources issues facing the state, performs analytical research, and establishes policies for the statewide implementation of technology.

The following financial statements have been prepared to conform with Generally Accepted Accounting Principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB).

Due to the statewide requirements embedded in Governmental Accounting Standards Board Statement No. 34, *Basic Financial Statements – and Management's Discussion and Analysis – for State and Local Governments*, the Comptroller of Public Accounts does not require the accompanying annual financial report to comply with all the requirements in this statement. The financial report will be considered for audit by the State Auditor as part of the audit of the State of Texas Comprehensive Annual Financial Report; therefore, an opinion has not been expressed on the financial statements and related information contained in this report.

Blended Component Units: No component units have been identified which should have been blended into an appropriated fund.

Fund Structure

The accompanying financial statements are presented on the basis of funds, each of which is considered a separate accounting entity.

UNAUDITED

Texas Department of Information Resources (313)

Governmental Fund Types & Government-wide Adjustment Fund Types

General Fund: The general fund is the principal operating fund used to account for most of the state's general activities. It accounts for all the financial resources except those accounted for in other funds.

Fiduciary Fund Types

Fiduciary funds account for assets held by the state in a trustee capacity or as an agent for individuals, private organizations, other governmental units, and/or other funds. When assets are held under the terms of a formal trust agreement, either a pension trust fund, or a private purpose trust fund is used.

Agency Funds: Agency funds are used to account for assets the government holds on behalf of others in a purely custodial capacity. Agency funds involve only the receipt, temporary investment, and remittance of fiduciary resources to individuals, private organizations, or other governments.

Basis of Accounting

The basis of accounting determines when revenues and expenditures or expenses are recognized in the accounts reported in the financial statements. The accounting and financial reporting treatment applied to a fund is determined by its measurement focus.

Governmental fund types that build the fund financial statements are accounted for using the modified accrual method basis of accounting. Under the modified accrual basis, revenues are recognized in the period in which they become both measurable and available to finance operations of the fiscal year or liquidate liabilities existing at fiscal year end. The State of Texas considers receivables collected within sixty days after year-end to be available and recognizes them as revenues of the current year for Fund Financial Statements prepared on the modified accrual basis. Expenditures and other uses of financial resources are recognized when the related liability is incurred.

Governmental adjustment fund types that will build the government-wide financial statements are accounted for using the full accrual basis of accounting. This includes capital assets, accumulated depreciation, unpaid Employee Compensable leave, the unmatured debt service (principal and interest) on general long-term liabilities, long-term capital leases, and long-term claims and judgments and full accrual revenues and expenses. The activity will be recognized in these fund types.

Budgets and Budgetary Accounting

The budget is prepared biennially and represents appropriations authorized by the legislature and approved by the Governor (the General Appropriations Act).

Unencumbered appropriations are generally subject to lapse 60 days after the end of the fiscal year for which they were appropriated.

UNAUDITED

Texas Department of Information Resources (313)

Assets, Liabilities, and Fund Balances/Net Assets

Assets

Cash & Cash Equivalents: Short-term highly liquid investments with an original maturity of three months or less are considered cash equivalents.

Restricted Assets: Restricted assets include monies or other resources restricted by legal or contractual requirements. These assets include proceeds of enterprise fund general obligation and revenue bonds and revenues set aside for statutory or contractual requirements. Assets held in reserve for guaranteed student loan defaults are also included.

Inventories and Prepaid Items: Inventories include both merchandise inventories on hand for sale and consumable inventories. Inventories are valued at cost, generally utilizing the last-in, first-out method. Inventories for governmental fund types are the purchase method accounting. The consumption method of accounting is used to account for inventories and prepaid items that appear in the governmental and proprietary fund types. The cost of these items is expensed when the items are consumed.

Capital Assets: Assets with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of one year should be capitalized. These assets are capitalized at cost or, if not purchased, at appraised fair value as of the date of acquisition. Purchases of assets by governmental funds are reported as expenditures. Depreciation is reported on all “exhaustible” assets. “Inexhaustible” assets such as works of art and historical treasures are not depreciated. Road and highway infrastructure is reported on the modified basis. Assets are depreciated over the estimated useful life of the asset using the straight-line method.

All capital assets acquired by proprietary fund or trust funds are reported at cost or estimated historical cost, if actual historical cost is not available. Donated assets are reported at fair value on the acquisition date. Depreciation is charged to operations over the estimated useful life of each asset, using the straight-line method.

Other Receivables: Other receivables include year-end revenue accruals not included in any other receivable category. This account can appear in governmental and proprietary fund types.

LIABILITIES

Accounts Payable: Accounts Payable represents the liability for the value for assets or services received at the balance sheet date for which payment is pending.

Other Payables: Other payables are the accrual at year-end of expenditure transactions not included in any other payable descriptions. Other payables may be included in either the governmental or proprietary fund types.

Employees' Compensable Leave Balances: Employees' Compensable Leave Balances represent the liability that becomes “due” upon the occurrence of relevant events such as resignations, retirements, and uses of leave balances by the covered employee. Liabilities are reported separately as either current or non-current in the statement of net assets.

UNAUDITED

Texas Department of Information Resources (313)

FUND BALANCE/NET ASSETS

The difference between fund assets and liabilities is 'Net Assets' on the government-wide, proprietary and fiduciary fund statements, and the 'Fund Balance' is the difference between fund assets and liabilities on the governmental fund statements.

Fund Balance Components: Fund balances for governmental funds are classified as nonspendable, restricted, committed, assigned or unassigned in the fund financial statements.

- Nonspendable fund balance includes amounts not available to be spent because they are either (1) not in spendable form or (2) legally or contractually required to be maintained intact.
- Restricted fund balance includes those resources that have constraints placed on their use through external parties or by law through constitutional provisions.
- Committed fund balance can be used only for specific purposes pursuant to constraints imposed by a formal action of the Texas Legislature, the state's highest level of decision making authority.
- Assigned fund balance includes amounts constrained by the state's intent to be used for specific purposes, but are neither restricted nor committed. Intent is expressed by (1) the Texas Legislature or (2) a body (for example, a budget or finance committee) or official to which the governing body has delegated the authority to assign amounts to be used for specific purposes.
- Unassigned fund balance is the residual classification for the general fund. This classification represents fund balance that was not assigned to other funds and was not restricted, committed or assigned to specific purposes within the general fund.

Invested In Capital Assets, Net Of Related Debt: Invested in capital assets, net of related debt consists of capital assets, net of accumulated depreciation and reduced by outstanding balances for bond, notes and other debt that are attributed to the acquisition, construction or improvement of those assets.

Restricted Net Assets: Restricted net assets result when constraints placed on net asset use are either externally imposed by creditors, grantors, contributors and the like or imposed by law through constitutional provisions or enabling legislation.

Unrestricted Net Assets: Unrestricted net assets consist of net assets that do not meet the definition of the two preceding categories. Unrestricted net assets often have constraints on resources, which are imposed by management but can be removed or modified.

UNAUDITED

Texas Department of Information Resources (313)

INTERFUND ACTIVITIES AND BALANCES

The agency has the following types of transactions between funds:

- (1) Transfers: Legally required transfers that are reported when incurred as “Transfers In” by the recipient fund and as “Transfers Out” by the disbursing fund.
- (2) Reimbursements: Reimbursements are repayments from funds responsible for expenditures or expenses to funds that made the actual payment. Reimbursements of expenditures made by one fund for another are recorded as expenditures in the reimbursing fund and as a reduction of expenditures in the reimbursed fund. Reimbursements are not displayed in the financial statements.

UNAUDITED

Texas Department of Information Resources (313)

NOTE 2: Capital Assets

A summary of changes in Capital Assets for the year ended August 31, 2018, is presented below:

Changes in Long-Term Liabilities

During the year ended August 31, 2018 the following changes occurred in liabilities.

Governmental Activities	Balance 9/1/2017	Additions	Reductions	Balance 8/31/2018	Amount Due in One Year	Amount Due Thereafter
Compensable Leave	\$2,077,788.45	\$ 1,972,902.12	\$ 1,894,111.33	\$ 2,156,579.24	\$ 1,354,563.63	\$ 802,015.61

Employees' Compensable Leave

A state employee is entitled to be paid for all unused vacation time accrued, in the event of the employee's resignation, dismissal, or separation from State employment, provided the employee has had continuous employment with the State for six months. Expenditures for accumulated annual leave balances are recognized in the period paid or taken in governmental fund types. For these fund types, the liability for unpaid benefits is recorded in the Statement of Net Assets. No liability is recorded for non-vesting accumulating rights to receive sick pay benefits.

Note 16: Subsequent Events

Beginning in Fiscal Year 2019, the Comptroller established the Statewide Network Applications Account. This account was added to the agency bill pattern to capture revenues and expenditures relating to the management and operation of the Texas.gov program.

UNAUDITED

Texas Department of Information Resources (313)

Note 17: Risk Management

The Department of Information Resources is exposed to a variety of civil claims resulting from the performance of its duties. It is Department policy to periodically assess the proper combination of commercial insurance and retention of risk to cover losses to which it may be exposed.

The Department, along with several other State agencies, has purchased automobile insurance through the State Office of Risk Management.

The Department assumes substantially all risks associated with tort and liability claims due to the performance of its duties. The Department is not involved in any risk pools with other government entities.

The Department's liabilities are reported when it is both probable that a loss has occurred and the amount of that loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported. Liabilities are reevaluated periodically to consider current settlements, frequency of claims, past experience and economic factors. There were no significant reductions in insurance coverage in the past year and losses did not exceed funding arrangements during the past three years. Changes in the balances of the agency's claims liabilities during fiscal year 2017 and 2018 were:

	Beginning Balance	Increases	Decreases	Ending Balance
2018	-	-	-	-
2017	-	-	-	-

UNAUDITED

Texas Department of Information Resources (313)

Note 18: Management Discussion and Analysis

As of August 31, 2018, DIR was funded primarily through cost recovery fees charged via interagency contracts and appropriated receipts. DIR earns revenue from the services it provides through its Cooperative Contracts; Communications and Technology Services (CTS); and Data Center Services (DCS) programs. DIR also received General Revenue funding for the implementation of House Bill 8 and Senate Bill 1910, 85th Legislature, relating to the delivery of security assessments and vulnerability and penetration testing.

The General Appropriations Act imposes caps on DIR's expenditure authority, requires DIR to obtain LBB approval to expend funds in excess of specifically appropriated amounts, and requires DIR to report program specific financial information to the LBB and Governor's office.

Senate Bill 1, 82nd Legislature, 1st Called Session, provides the Legislature with the authority to appropriate DIR funds out of the Clearing Fund Account, Telecommunications Revolving Account, and Statewide Technology Account to be used to fund the costs of DIR's non-revenue generating programs. The bill also allows for appropriations from the Clearing Fund Account and the Telecommunications Revolving Account to fund activities included in Texas Government Code Chapter 2054 (Information Resources Management Act).

The amounts reported as total fund balances increased from \$10.5 million to \$10.6 million from the fiscal year ending August 31, 2017 to the fiscal year ending August 31, 2018, respectively.

The General Appropriations Act, 85th Legislature, requires that DIR report costs avoided and/or savings obtained through its cooperative activities and a list of the agencies or units of local government for which the clearing fund account was used during the fiscal year ending August 31, 2018. For the fiscal year ending August 31, 2018, DIR cooperative activities generated approximately \$208 million in costs savings for customers of the Cooperative Contracts program. A list of customers who procured goods and services through this program is presented at Addendum 1.

DIR performs a key oversight role in the Texas.gov portal with its partner TEXAS NICUSA LLC. For the fiscal year ending August 31, 2018, the portal generated approximately \$25 million in general revenue for the state.

The State of Texas, acting by and through DIR, has executed several agreements for the provision of data center related services to state agencies and other associated entities within the state. These agreements have a beginning date of July 1, 2012, and varying end date and extension provisions through August 31, 2020. As a component of these agreements, these service providers have provided numerous Transition and Transformation Services as stipulated in each of the respective Master Service Agreements. In consideration for the provision of these services, and pursuant to the arrangements provided in these Master Service Agreements, DIR has incurred approximately \$73,027,706 in Transition and Transformation Services expenditures through August 31, 2018. DIR has also agreed to pay an additional \$16,342,751 for Transition and Transformation services

UNAUDITED

Texas Department of Information Resources (313)

in accordance with the Master Services Agreements, through August 2020. Payments of these expenditures are funded through amounts billed to and collected from these state agencies and associated entities on a monthly basis.
