

# Department of Information Resources (DIR) Secure Developer Program

Learning Tree provides the training and operational management services for DIR's InfoSec Academy. The Texas DIR InfoSec Academy provides security and education training support to state of Texas agencies and institutions of higher education. The secure developer certification training list below and exams are included in the program:

## **CertNexus Certified Cyber Secure Coder Training**

*Course 2071 • 3 Days*

The stakes for software security are very high, and yet many development teams deal with software security only after the code has been developed and the software is being prepared for delivery. As with any aspect of software quality, to ensure successful implementation, security and privacy issues should be managed throughout the entire software development lifecycle.

## **EC-Council Certified Application Security Engineer (CASE) Java**

*Course 2027 • 3 Days*

This 3-Day EC-Council Certified Application Security Engineer (CASE) Java course is designed to be a hands-on, comprehensive application security training course that will help software professionals create secure applications. It will train software developers on the critical security skills and knowledge required throughout a typical software development life cycle (SDLC). The course focuses on the importance of implementing secure methodologies and practices required in today's insecure operating environment.

## **EC-Council Certified Application Security Engineer (CASE) .NET**

*Course 2028 • 3 Days*

This 3-Day EC-Council Certified Application Security Engineer (CASE) .NET course is designed to be a hands-on, comprehensive application security training course that will help software professionals create secure applications. It will train software developers on the critical security skills and knowledge required throughout a typical software development life cycle (SDLC). The course focuses on the importance of implementing secure methodologies and practices required in today's insecure operating environment.
